

Attachment Instructions

DRACO
SAILING HARDWARE

Product: ASL
Draco aluminium soft loop sailing block

1. Remove the bottom bolt on one side of the block.

2. Turn the block around. Turn the other bottom bolt out about 2/3 of the way.

3. Align the hole in the sheave to the hole in inner race.

4. Shift the centre pin downwards, opening a gap at the top of the pin.

5. Insert one end of a continuous soft loop above the centre pin.

6. Loop the soft loop over the block and insert the other end in above the pin.

7. Push the centre pin back into position. Make sure that both ends of the soft loop are around the centre pin.

8. Align the bolt hole in the centre pin with the bolt hole in the side wall.

9. Fasten the lower bolts on both sides of the block.

10. Use the top corner holes to tie the soft loop upper section in place. All done!

Note A. You can also remove the centre pin and shackle the ends of the soft loop.

Note B. Do NOT attach the soft loop only to the top of the block.
